A general outline. We will fine-tune the details together on the discovery call.

1. **Before arrival:** we review the manifest and outbound build plan as soon as the truck leaves your customer's facility.
2. **Receiving:** driver check-in, seal and count checked against the BOL, photos, and a receiving scan on every carton.
3. **Build:** inbound pallets broken down and rebuilt by route per your plan and stacking order.
4. **Staging:** outbound pallets staged by route and ready for pickup.
5. **Pickup:** forklift loading at ground level. Your delivery pros scan each item at pickup.
6. **Damages and returns:** reported the same day with photos and held for LTL pickup.

Terms

- Invoiced weekly, with receiving scans and photos available on request
